Services we offer

Business Transformation as a Service

We help you become more sustainable by redesigning your business processes efficiently. Through RISE with SAP, we help expand your business transformation horizons. We cover all types of implementation, such as; greenfield, brownfield, and Bluefield. With our expertise and growth strategy, you can continue to hustle diligently. We assure safety and security in all the steps and measures we take. Our priority is to make you handle every process with minimum hassle.

Finance Transformation as a Service

We support the evolution of your finance department with FTaaS (Finance Transformation as a Service) and lead your finance team with best practices and vision aligned with the business strategy. We help to automate your payments by integrating with bank systems. We help you achieve consolidation through group reporting, providing a holistic view of your businesses.

Application Managed Services

Gaining control of your SAP system is imperative for business success. With Managed Services in place, your IT team's focus on strategic projects gets more attention, giving your business the technology boost they need. Our Managed Service Advisory function assists customers in selecting the optimum managed service model and successfully transitioning to the target state.

Innovations on Business Technology Platform

iQuantM applies its unique LoB and industry expertise with SAP BTP to build new applications, integrations, and content. This results in more personalized solution experiences, improved business context, and faster time to market – powered by an enterprise-grade platform so you can run confidently. Our strategy is to work with customers to build and innovate around SAP BTP to deliver the Intelligent Enterprise so customers can achieve their desired outcomes.

EPPM Transformation as a Service

Enterprise Portfolio and Project Management (EPPM) helps organisations plan, schedule and keep track of all projects and portfolios. This gives real-time reports to appropriate stakeholders, from the project sponsor to the BPO (Business Process Owner).

Resource Augmentation

Our resource pool has deep expertise in various solutions of SAP, spread across various geographies. This provides an edge to customers who are looking to scale up their SAP consulting team, due to sudden demand or unscheduled projects. We will be able to provide a continuous support as our resources are available in various continents, working in different timezones.

Industries we work with

Having worked on Multiple SAP projects over the decades across various industry verticals, our team can work with your Enterprise to truly understand requirements, document them extensively and provide the best solution ensuring the maximum realisation of value.
